Welcome to our user interface decoding and navigation manual. We hope to simplify your efforts in understanding this system, with the intent to help exemplify your user experience.

—-

Enter The App:

To start the system, please press the ELAN app icon located on the dock bar in the IPAD
This will be your only icon needed to get it into the app for automating your home.

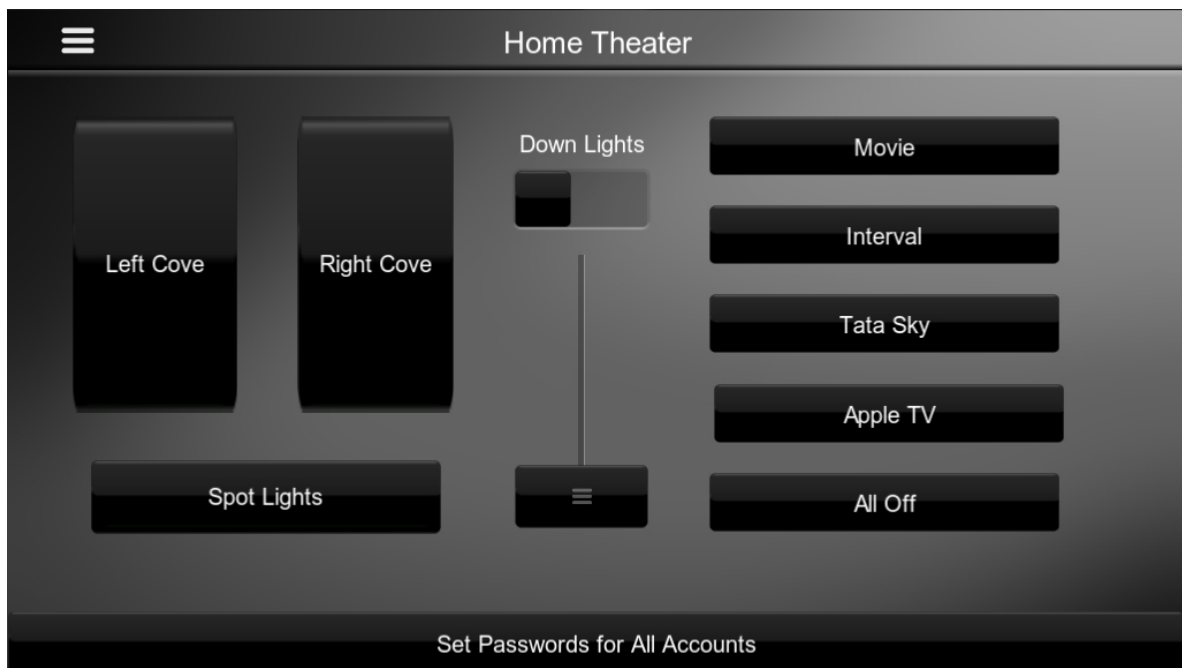

—-

Button:

At the home page of ELAN, we have Lighting , Climate & Media as selective options. A single click gets us into its individual selection bar.

—-

Lighting:

To switch the mode of light/scenerio for a room of your preference, simply press the defined button.

—-

## Media:

To watch a movie, we have placed a pre defined scenario.

—-

CHANNELS:

On selecting the TataSky you have a menu been opened up which allows you to switch to/search for a channel of your preference, simply press the button. You can save your favourite channels to by pressing the button. Then come back to these frequently visited channels whenever you want.

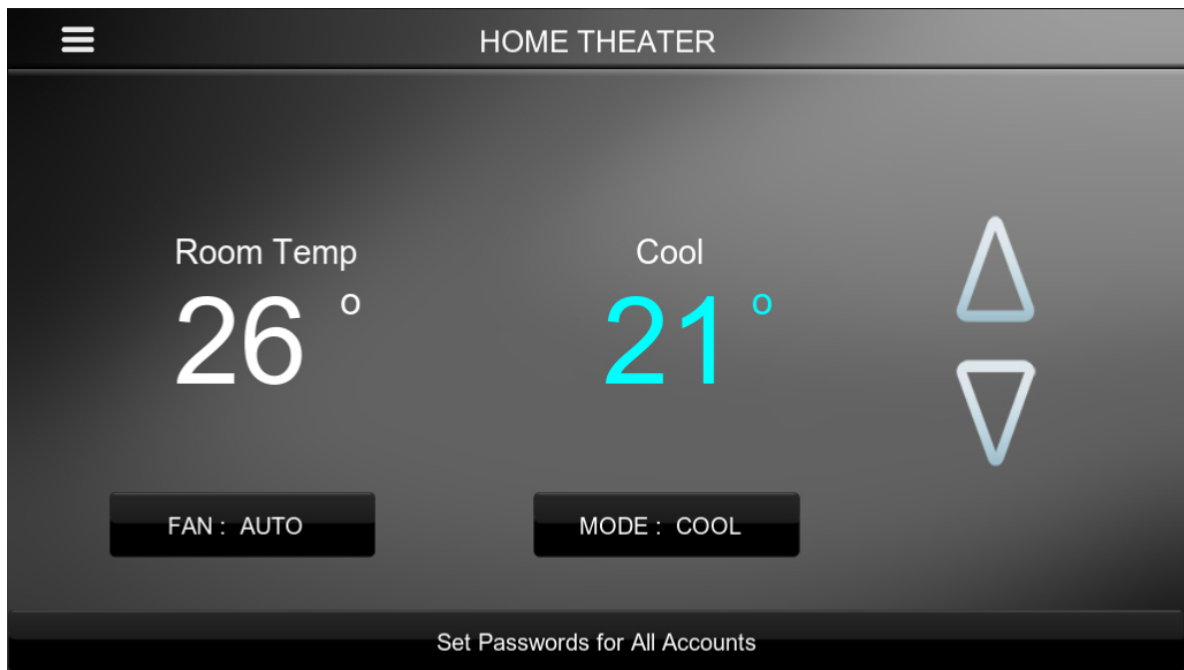

—-

VOLUME:

To increase/decrease the system's volume, simply turn the dial / press the + /- button.

—-

Climate:

To operate AC select climate from the home page , and simply control the mode/temperature and cooling from individual buttons.

—-

REMOTE NAVIGATION:

All your devices are centrally controlled through this user interface. Forget a thousand remotes, buttons and commands. Simply follow these guidelines to navigate through all your systems with just a touch here and a touch there! Your focus and our goal was to ensure that the system works according to you and your requirements, at your command, at any time of the day.

—-

All OFF :

Moving out of the room is not at all complicated as the ALL OFF button switches off all the defined equipments and lights as per the steps assigned.
